SUMMARY

Call me Mark, Software engineer who enjoys building practical solutions and understanding how systems work. With experience in software development (self-taught mostly), enjoy learning independently and solving problems. Focusing on Software Development but with Design, QA Infrastructure and IoT Skills.

EDUCATION

King Mongkut's University of Technology North Bangkok Mar 2026

Bachelor of Technology in Information Technology with 2.96 GPA

Thai-Austrian Technical College Mar 2024

Diploma of Computer Hardware with 3.15 GPA

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python, PHP, SQL

Frontend Development: JavaScript and TypeScript framework (React, Next.js) and TailwindCSS

Backend Development: Python and Javascript framework (FastAPI, Node.js)

Design: Figma, Adobe XD and Canva

Quality Assurance: Manual (Testcase design, Bug report)

Automated using Playwright (TypeScript, JavaScript)

Technologies Tools: Git, Github CICD, Docker, Postman, Azure, Bun, Npm, Mysql, Firebase
MongoDB, PostgreSQL

EXPERIENCE

Quality Assurance Tester Intern | Hybrid Apr 2025 - Jun 2025

Softdebut Co., Ltd

- Executed cross-platform manual tests aligned with Adobe XD blueprints.
- Implemented end-to-end automation using Playwright to ensure system stability.
- Collaborated with the dev team by providing actionable test reports and feedback.

Information Technology Generalist Intern | Onsite Apr 2023 - Aug 2023

The Zign Hotel Pattaya

- Maintained robust network connectivity across all hotel buildings and guest suites.
- Troubleshoot and resolved electronic security system issues.
- Delivered technical support and hardware repairs for PCs, notebooks, and mobile devices.
- Managed hotel digital assets, including the website and core operational software.

Graphic Designer Intern | Onsite Apr 2021 - Aug 2021

TMN TV Pattaya

- Filmed and edited news and advertising content.
- Created professional logos, banners, and digital assets.

LANGUAGE

ENGLISH

- Technical discussions.
- Documentation and Jira tickets.
- Technical Reading and writing.
- Everyday conversations (not yet fluent).

THAI

- Native.

PROJECT

Monitoring Buoy in Mangrove Forests | IOT, ARDUINO C, REACT, NODE.JS, NEXT.JS, MYSQL, PHP
2026

- Developed a solar-powered IoT buoy for mangrove monitoring, deployed by university researchers to collect environmental data remotely.

SafeDownly | Python, Browser Extension, Native Messaging
2026

- Developed a Windows utility with a browser extension to intercept downloads, quarantine files, and allow users to review them before saving. Built for personal use.

Smart security door system | No code APK (Kodular), Computer Vision, IOT, Firebase
2024

- Developed an IoT-based smart door system using ESP32-Camera with facial recognition, Telegram notifications, and Firebase-backed access logging.

INTERESTS

Automation system

- Humans have limited time, and if something can generate results while we are busy doing other things, I feel like I'm gaining something extra within the same 24-hour a day.

Utility software

- I believe there are still many things in the world with blind spots or lacking something. It has to be someone to fill those gaps.

AI-driven development

- I believe AI is most valuable when it accelerates development while engineers continue to understand, verify, and own the solutions they build.
